APPLICANT: Brett P. Monia
APPLICANT: Liex M. Cowsert
TITLE OF INVENTION: ANTISENSE MODULATION OF PKA CATALYTIC SUBUNIT C-ALPHA EXPRESSION
FILE REFERENCE: RTS-0088
Sequence 7, Application US/09318794A

| Sequence 7, Application US/09318794A
| Patent No. 6177264
| GENERAL INFORMATION:
| APPLICANT: DEGUESA AKTIENGESELLSCHAFT
| TITLE OF INVENTION: METHOD FOR THE PERMENTATIVE PRODUCTION OF D-PANTOTHENIC
| TITLE OF INVENTION: ACID USING CORYNEFORM BACTERIA
| FILE REFERENCE: eggeling
| CURRENT APPLICATION NUMBER: US/09/318,794A
| CURRENT APPLICATION NUMBER: DE 198 55 312.9
| PRIOR FILING DATE: 1998-12-01
| NUMBER OF SEQ ID NOS: 9
| SOFTWARE: Patentin Ver. 2.0
| LENGTHARE: Patentin Ver. 2.0

Sequence 71, Application US/09668313A

Batent No. 6503756

GENERAL INFORMATION:
APPLICANT: Breat P. Monia
APPLICANT: Busen M. Freier
APPLICANT: Jacqueline Wyatt
TITLE OF INVENTION: ANTSENSE MODULATION OF SYNTAXIN 4 INTERACTING PROTEIN EXPRESSION
TITLE OF INVENTION: ANTSENSE: US/09/668,313A
CURRENT PILING DATE: 2000-09-22
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          ; OTHER INFORMATION: (NP)2 US-09-410-132-10

Sequence 4, Application US/08975570;
Patent No. 5945336;
APPLICANT: Brown, Steven Joel
APPLICANT: Dattagupta, Nanibhushan
APPLICANT: Dattagupta, Nanibhushan
APPLICANT: Naidu, Yathi M.
TITLE OF INVENTION: PROLIFERATION USING ANTISENSE OLIGONUCLECTIDES TO INTERLEUKIN-171TLE OF INVENTION: MRNA.
NUMBER OF SEQUENCES: 19
Sequence 4, Application US/08486408
Patent No. 2716846
GENERAL INFORMATION:
APPLICANT: Brown, Steven Joel
APPLICANT: Dattagupta, Nanibhushan
APPLICANT: Naidu, Yathi M.
TITLE OF INVENTION: PROLIFERATION USING ANTISENSE OLIGONUCLEOTIDES TO INTERLEUKIN-C
TITLE OF INVENTION: MRNA

US-09-371-772B-7/C

i Sequence 7, Application US/09371772B

i Patent No. 6566127

GENERAL INFORMATION:

APPLICANT: Ribozyme Pharmaceuticals, Inc.

APPLICANT: Rabozyme Pharmaceuticals, Inc.

APPLICANT: Rabozyme Pharmaceuticals, Inc.

APPLICANT: Rabozyme Pharmaceuticals, Inc.

APPLICANT: Bacobedo, Jaime

APPLICANT: Sciencemb, Dan

APPLICANT: Escobedo, Jaime

TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Re

TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Re

TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Re

TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Re

TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor

CURRENT APPLICATION NUMBER: US/09/371,772B

CURRENT APPLICATION NUMBER: US 60/005,974

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Sequence 10, Application US/09015188C

Sequence 10, Application US/09015188C

Patent No. 6399358

GENERAL INFORMATION:

APPLICANT: Milliams, Kevin J

APPLICANT: Tabas, Ira

TITLE OF INVENTION: 6-Sulforransferase

TITLE OF INVENTION: 6-Sulforransferase

FILE REFERENCE: JEFF-0231

CURRENT APPLICATION NUMBER: US/09/015,188C

CURRENT FILING DATE: 1998-01-29

NUMBER OF SEQ ID NOS: 17

SOFTWARE: Patentin Ver. 2.0

FENAMEN: 10 100

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               RESULT 239

US-09-448-201-39/c

1 Sequence 39, Application US/09248203

1 Patent No. 6043346

1 Patent No. 6043346

1 GENERAL INFORMATION:

APPLICANT: Kleyn, Patrick W.
APPLICANT: Kleyn, Patrick W.
APPLICANT: Moore, Karen J.

1 TITLE OF INVENTION: COMPOSITIONS FOR THE TREATMENT AND
1 TITLE OF INVENTION: DIAGNOSIS OF BODY WEIGHT DISORDERS, INCLUDING OBESITY

NUMBER OF SEQUENCES: 60

CORRESPONDENCE ADDRESS:
ADDRESSEE: Pennie & Edmonds LLP
STREET: New York
COUNTRY: Us S.A.
ZITE: New York
STATE: New York
COUNTRY: U S.A.
ZITE: 10036-2711
COMPUTER READABLE FORM:
MEDIUM TYPE: Floppy disk
COMPUTER: IBM PC compatible
OPERATING SYSTEM: PC-DOS/MS-DOS
SOFTWARE: PatentIn Release #1.0, Version #1.30
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/09/248,203
FILING DATE:
PLANCE CONTRACTOR.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Query Match 3.0%; Score 12.6; DB 1; Length 19; Best Local Similarity 78.9%; Pred.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Recombinant polypeptides and peptides, nucleic acids coding for the same and use of these polypeptides and peptides in the diagnostic of tuberculosis.
                                                                                                                                                                                                  Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     RESULT 280

US-08-531-864-13

US-08-531-864-13

Sequence 13, Application US/08531864

Patent No. 5977300

GENERAL INFORMATION:

GENERAL INFORMATION:

TITLE OF INVENTION: ISOLAted No. 5977300a- and Decapeptides Which

TITLE OF INVENTION: Bind to HLA-B44 Molecules And The Use Thereof

NUMBER OF SEQUENCES: 27

CORRESPONDENCE ADDRESS:

ADDRESSE: Felfe & Lynch

STREET: 805 Third Avenue

CITY: New York City

STATE: New York City
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  ..
                                                                                                                                                                                                  .

US-08-373-636C-13

Sequence 13, Application US/08373636C

Patent No. 5997870

GENERAL INFORMATION:

APPLICANT: Coulie, Pierre; Boon-Falleur, Thierry

TITLE OF INVENTION: Isolated Nucleic Acid Molecules Which Codes

NUMBER OF SEQUENCES: 18

CORRESPONDENCE ADDRESS:

ADDRESSEE: Felfe & Lynch
STREET: 805 Third Avenue

CITY: New York City

STATE: New York City

STATE: New York City

STATE: New York City

STATE: New York City
